

NAME: _____

HOUR: _____

SCIENTIFIC METHOD

Step by step instructions to experiments. All lab experiment papers are to be set up in this way.

1. **PROBLEM:** What question are you trying to answer by doing this experiment?
2. **HYPOTHESIS:** How do you think it will turn out?
3. **PROCEDURE:** List, in order, the steps you will take in doing this experiment. Don't forget your materials!
4. **OBSERVATIONS:** Explain exactly what you see, smell, hear..... anything that you observe during your experiment. This is your data or results!
5. **CONCLUSION:** Based on the data you collected, what is the answer to your question?
